

Enrich Persian Clover

The ultimate dry matter producer

Dramatically boost your dry matter production using our new release – ENRICH Persian clover. A stand out clover in the market ENRICH can be used as a specialty forage crop or the mixes with Italian ryegrass, brassicas, and in pasture seed

- A premium annual clover for highly nutritious and abundant feed
- Producing high yield, large leaf size and most importantly a late flowering trait.
- Increased dry matter yields and better persistence when compared to sub clover, balansa clover, and other Persian clovers.
- Highly nutritious soft seeded and used in multiple grazing or silage situations
 - ENRICH can be either autumn or spring sown.
