SF Pacer

Setting the pace

Australian release: 2007

SF Pacer has been bred as a replacement for Pasja by its plant breeder. It was selected from 4 breeders lines selected and evaluated for increased yield, improved re-growth and reduced bolting between grazings.

In Australian and New Zealand trials it has shown rapid establishment, fast growth to first grazing and outstanding regrowth.

pedigree

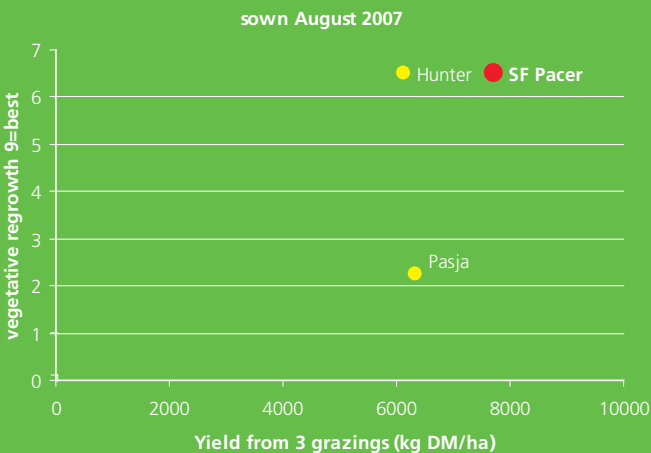

Relative Forage Ratings - relative to industry standards

Cultivar yield	sowing rate	grazings	maturity	Initial yield	regrowth	Total yield	Bolting 9=best
SF Pacer	3-5kg/ha	multiple	42- 60 days	109	130	122	6.50
Pasja	3-5kg/ha	multiple	42- 60 days	100	100	100	2.25

* relative forage ratings based on data from Gundagai 2007 trial detailed below.
